Independent

Web Designer | Dec 2012 - Jul 2014 | Vietnam

Worked with marketplaces to provide design templates & designed web interface for worldwide clients.

TESTIMONIALS

David Sanderson | Founder & CEO, Nugit

“In each project, Giang brought his unique blend of creativity, would often challenge our brief to make it better, adding his input not just in visual design but general 'product-sense' and customer understanding. Importantly, it is clear that Giang is constantly staying up to date with the latest design patterns and trends, so you can be sure that you won't be getting something that looks dated before it's launched.

Giving a creative challenge to Giang means it's as good as done, and done on time. He works hard and gives a shit, treating the project like it's his own.”

Ridzwan Aminuddin | Former Senior Product Manager, Ninjavan

“I worked with Giang on a multi platform solution that Ninja Van was developing. Giang was tasked to deliver a cross device platform that had a consistent UX built upon material design that would resonate with a particular persona of individuals. Giang delivered immaculate high quality work, was timely, communicated extremely well and exceeded my expectations in many areas especially so in his ability to design and layouts that would work with my specific use cases while still retaining simplicity and familiar ux layouts. I look forward to continually working with Giang in future. He is detail oriented and a model UX professional.”

Edi Hartono | Principal Engineer, SP Group

“Not only Giang delivers the design requirement; He give feedbacks, add value and improve where possible.”
